DETAILED ACTION

Election/Restrictions

In response to the Applicant's argument in support of traversal of the election of species requirement, the Examiner withdraws the election of species. And as such, Group I consists of claims 1-24.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobussen et al (US Patent 6,245,369).

Kobussen et al teach a method and means for controlling the variations in weight of extruded sausages. More specifically, the apparatus of Kossen et al includes a pump assembly, a conveyor, a portioning mechanism, a weighing mechanism and at least one filling mechanism. Regarding claim 2, a hopper assembly is capable of receiving ground meat and a main displacement assembly. As for claim 3, the main displacement assembly includes a vacuum pump capable of applying a vacuum to ground meat located in the hopper assembly. Regarding claims 6 and 7, the drive mechanism includes a motor that is operatively connected to a location monitoring mechanism and the location monitoring mechanism is electrically connected to an electronic control. With regards to claim 9, the electronic control is operatively connected to the conveyor.

Allowable Subject Matter

Claims 13-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Summary: Claims 1-12 are rejected, while claims 13-24 are objected to as being allowable dependent claim.
